

FACEOUT 3D

FACEOUT 3D is a three dimensional modeling system for books. Our 3D system is unique in that each 3D option we've created represents actual photographed books for maximum realism. Nothing is faked. Your cover will be digitally wrapped around a real book. And it's easy to use!

Choose from 61 templates. Every 3D option has detailed guides that walk you through each step. In addition we supply you with a PDF instruction manual and short video tutorials that visually walk you through the process. Since the Faceout 3D templates are real photographs, every detail is perfect, and customizable.

INDIVIDUAL TEMPLATES: \$25/EACH, 10 OR MORE, 20% DISCOUNT
